

This project consists of a 1,041 outdoor facility with both male and female toilets and a small storage room. The facility is constructed of Hardie-board siding and heavy timber roof construction to blend in with the surrounding outdoor environment. The facility is based on providing a memorial for David Bruce Clarke former CEO of Catawba Regional Hospice, now Carolina Caring who passed away in 2021. Its location at the top of the hill is with the concept of looking over the whole Carolina Caring Complex that Dave Clark built. The facility will be used by Carolina Caring for families of patients of the facility and by the staff on certain occasions for meetings.
